" " " " (1934)	
" " Families or Separate Occupiers (Census 1921)	
Assessable value 1943	£33,205
Sum represented by ld rate	£117:11:9

EXTRACTS FROM VITAL STATISTICS FOR THE YEAR

<u>Live Births</u>	Total	Males	Females
Legitimate	58 }	33	21
Illogitimate		2	2

<u>Birth Rate</u>	1938	-	13.55	per 1,000 population
	1939	-	11.93	" " "
	1942	-	16.8	" " "
	1943	-	16.6	" " "
England & Wales	1939	-	15.00	" " "
	1942	-	15.8	" " "
	1943	-	16.5	" " "

Deaths Total 65. Males 30. Females 35.

<u>Death Rate</u>	1938	-	16.23	per 1,000 population
	1939	-	14.13	" " "
	1942	-	17.83	" " "
	1943	-	18.9	" " "
England & Wales	1938	-	11.6	" " "
	1939	-	12.1	" " "
	1942	-	11.6	" " "
	1943	-	12.1	" " "

Number of women dying in, or in consequence of, childbirth -
 From Sepsis NIL
 From other causes NIL

Death of Infants under 1 year of age per 1,000 live births - 0
 Sheringham 0
 England 50.0

<u>Still Births</u>	Legitimate	Illegitimate	Total
	2	1	3

There were 13 deaths attributable to cancer - 4 being male and 9 female.

GENERAL PROVISIONS OF HEALTH SERVICES IN THE AREA

1. Public Health Officers to the Local Authority

D. B. C. Lawson, M.B., C.H.B. (Aberdeen), is part time Medical Officer of Health. Also Medical Officer of Health to the Erpingham Rural District Council and Medical Officer in charge of the Erpingham Rural, North Walsham Urban and Sheringham Urban Joint Isolation Hospital, and Medical Officer to the Poor Law Institution, West Beckham.

Mr. J. A. Thompson, M.R.San.I., M.S.I.A., is Surveyor and Sanitary Inspector.

2. Nursing in the Home

(a) General. There is no District Nursing Association. A Queen's District Nurse is provided by the Sheringham Social Service League.

(b) Infectious Diseases. Almost all cases are removed to Hospital.

3. Midwives.

Two midwives practise in the area.

No midwife is supplied or subsidised by the Council.

4. Laboratory Facilities.

Sputum, Swabs etc. are examined by the County Laboratory.

Water is analysed either by the County Analyst, or by the Clinical Research Association.

5. Hospitals.

The District is served by -

1. The Cromer & District Hospital.
2. The Norfolk & Norwich Hospital.
3. The Jenny Lind Hospital for Children.

The Norfolk & Norwich Hospital at Norwich has all the usual special departments, including dental, ophthalmic and massage. The Cromer & District Hospital has an X-ray apparatus.

6. Maternal Mortality

There is an arrangement with the County Medical Officer of Health by which cases are investigated with the local Medical Officer in conjunction with the practitioner attending the case.

7. Institutional Provision for the care of Mental Defectives.

This has been provided by the County Council.

8. Ambulance Facilities

For infectious cases - Cromer U.D.C. Motor Ambulance.

For non-infectious cases - The Division of the St. John Ambulance Brigade at Cromer have a Motor Ambulance which is used for the transport of Sheringham cases.

9. Clinics and Treatment Centres

A Maternity and Child Welfare Centre organised by the Norfolk County Council does exceedingly good work in this department. The centre is growing in size and popularity. As many as 40 mothers with their children have attended in one afternoon.

There is no Ante-natal Clinic, School Clinic, Orthopaedic Clinic or Treatment Centre for Venereal Diseases in the district.

There is a clinic for Tuberculosis Cases held by one of the County Tuberculosis Officers at specified times at Cromer Hospital.

SANITARY CIRCUMSTANCES OF THE AREA

The water of Sheringham is supplied by the Sheringham Gas & Water Company. It is derived from deep wells in the chalk, and from springs situated within their collecting grounds. Bacteriological examinations are carried out each month.

Analysis shows the water to be of excellent quality for all purposes. The quantity is sufficient for all purposes. There is, and has been, no reason to enforce any restrictions on its use in this Urban District.

DRAINAGE AND SEWERAGE

The Urban District is sewered throughout with a system which needs much improvement. It is quite incapable of dealing with an excessive and sudden rainfall. The outfall is well below ordinary low-water mark in the North Sea.

Closet Accommodation

The houses in Sheringham are supplied with water closets of modern pattern.

All Sewers are flushed twice a week in Summer, and once a week in Winter. The dead-ends are flushed from the water cart in addition.

There are no Pail Closets or Midden Privies in Sheringham.

Scavenging

Dust-bins are emptied once weekly by the Council's carts. House refuse is disposed of by the method of controlled tipping on a site on the Cromer Road. This method of disposal of house refuse has proved entirely satisfactory in that it is effective and inexpensive.

SANITARY INSPECTION OF THE AREA

(see Sanitary Inspector's Report)

Premises and Occupations controlled by By-Laws

There is no Common Lodging House or Offensive Trade in Sheringham.

Schools

The Schools are of a modern type. The water supply and sanitary conditions are quite satisfactory.

In case of notifiable infectious diseases the schools are at once visited by the Medical Officer of Health, the scholars inspected, and endeavour made to exclude infective children.

INSPECTION AND SUPERVISION OF FOOD

Milk Supply

All the Dairies, Milk Shops and Cowsheds have been inspected during the year.

Meat and Other Foods

There is one Slaughter House in the district, which has been inspected during the year.

Chemical and Bacteriological Examination of Food

The County Laboratory carried out bacteriological examination of milk and other food if necessary.

SURVEYOR'S & INSPECTOR'S REPORT for the year 1943

DRAINS and SANITARY CONVENIENCES

Gas Works	1
Tailor	2
Cycles	3
Garages	6
Blacksmiths	1
Electricity	1

INSPECTIONS

Workshops	1
Factories	1

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASES

There were 348 cases of Notifiable Infectious Disease. 6 cases of Scarlet Fever; 2 cases of Pneumonia; and none of Diphtheria.

The Isolation Hospital is situated at Roughton. It is the Joint Isolation Hospital of the Erpingham Rural, North Walsham Urban and Sheringham Urban Districts. It has 2 pavilions of 8 beds each, administrative block and a cottage for the housekeeper and caretaker

In the event of a case of Smallpox arising an arrangement has been made between the Joint Isolation Hospital and the Isolation Hospital of the Cromer Urban District Council whereby one or the other will be used for the isolation of this disease.

DIPHTHERIA IMMUNISATION

The number of children immunised against diphtheria for the age group under five remains unsatisfactory, being only 25.5 per cent. The children immunised between the age of over 5 and under 15 is 66 per cent.

NOTIFIABLE DISEASES (other than Tuberculosis)

during the year 1943
